

# CONFIGURAÇÃO DE VPN – WINDOWS 10

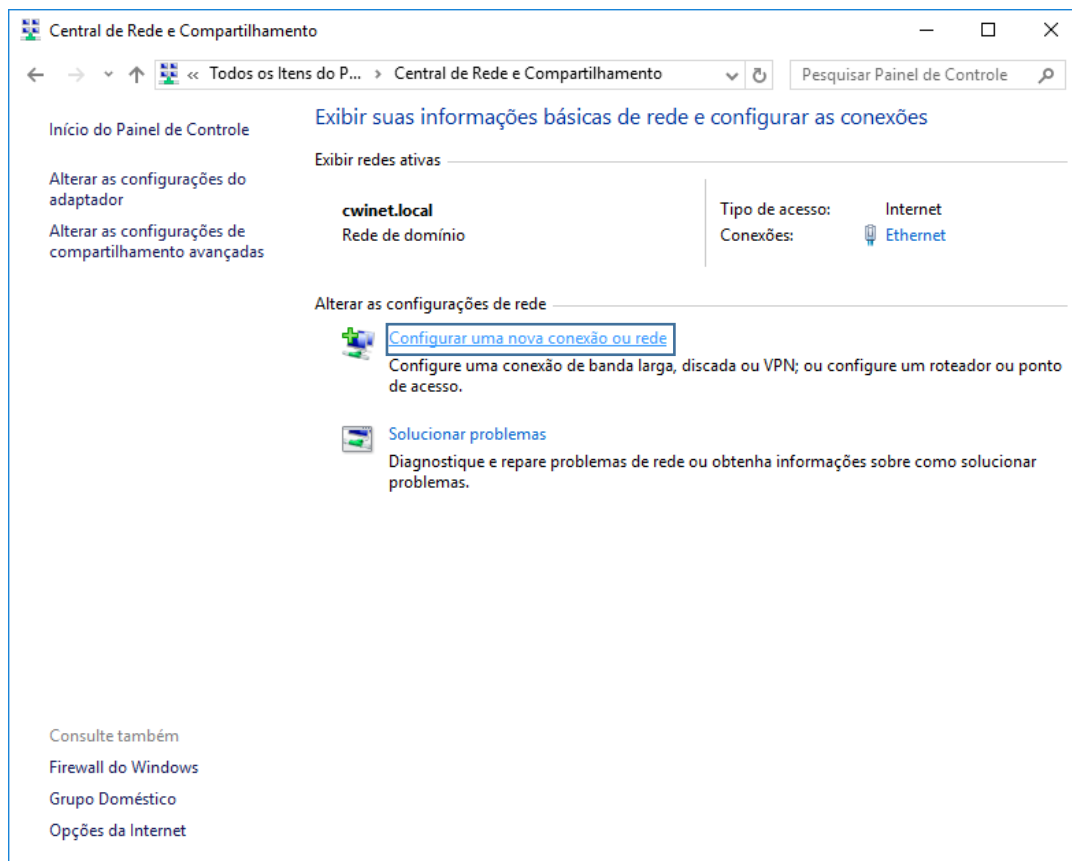

1. Abra o painel de controle.

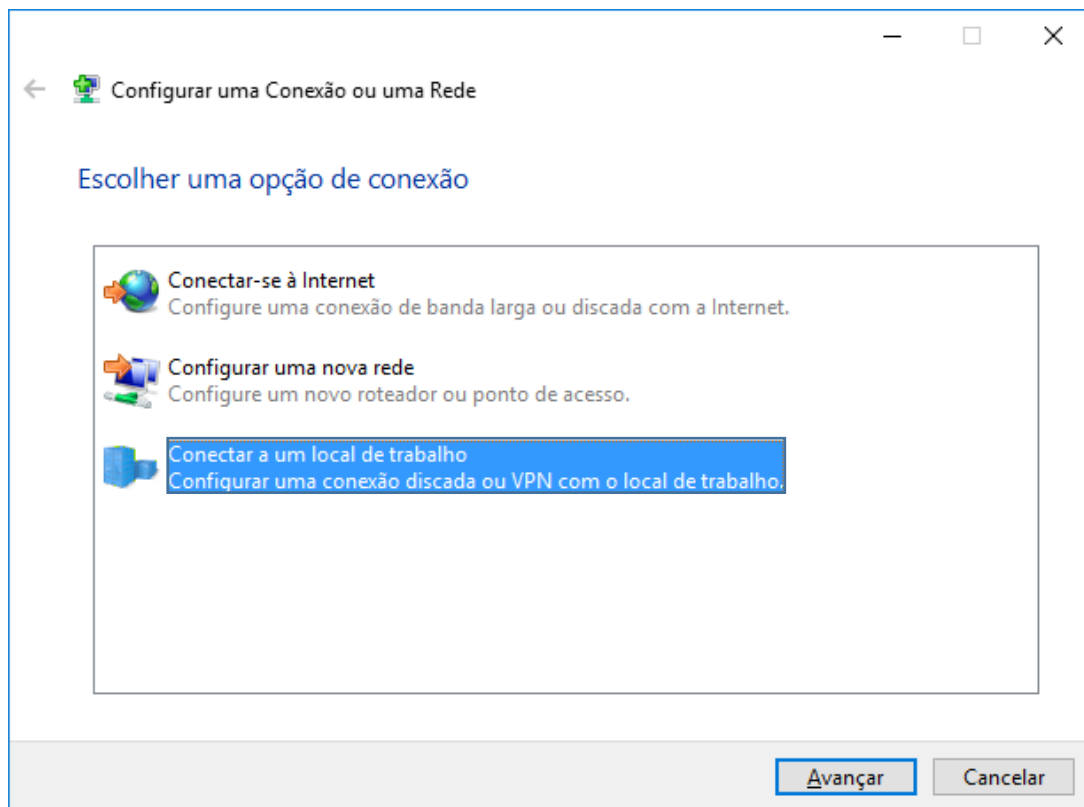

2. Clique em “Central de Rede e Compartilhamento”.

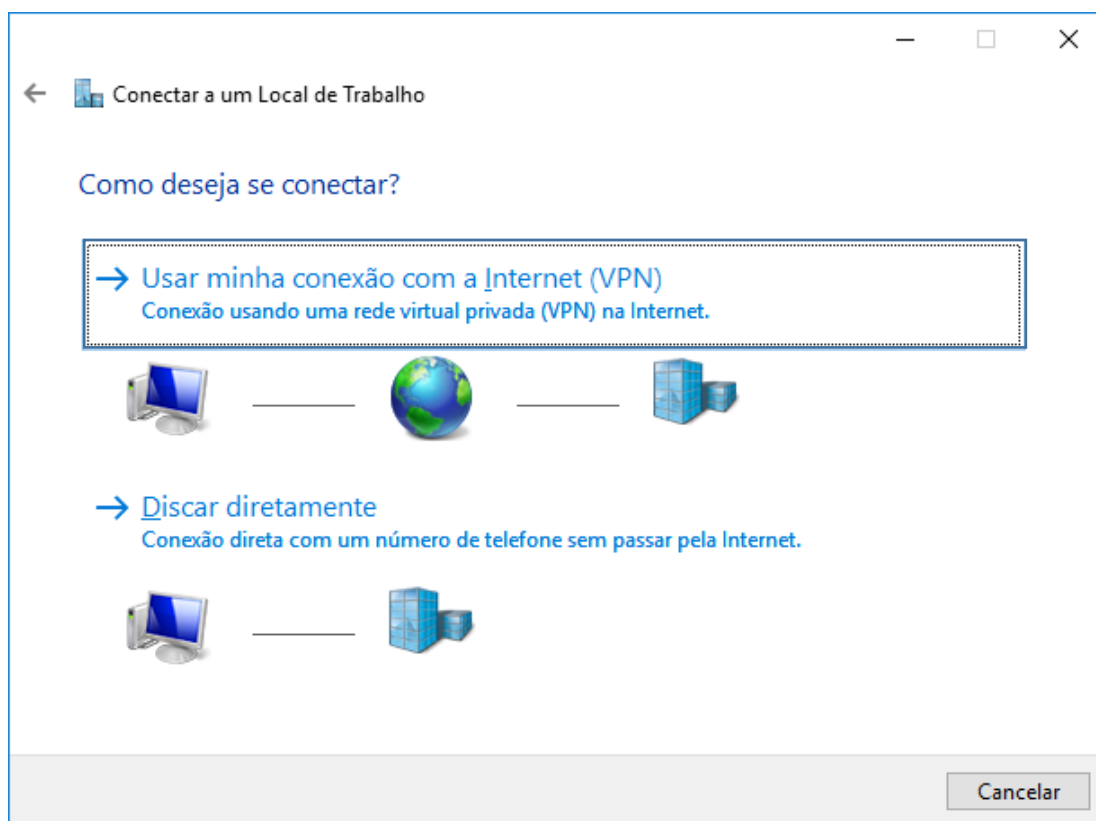

3. Clique em “Configurar uma nova conexão ou rede”.

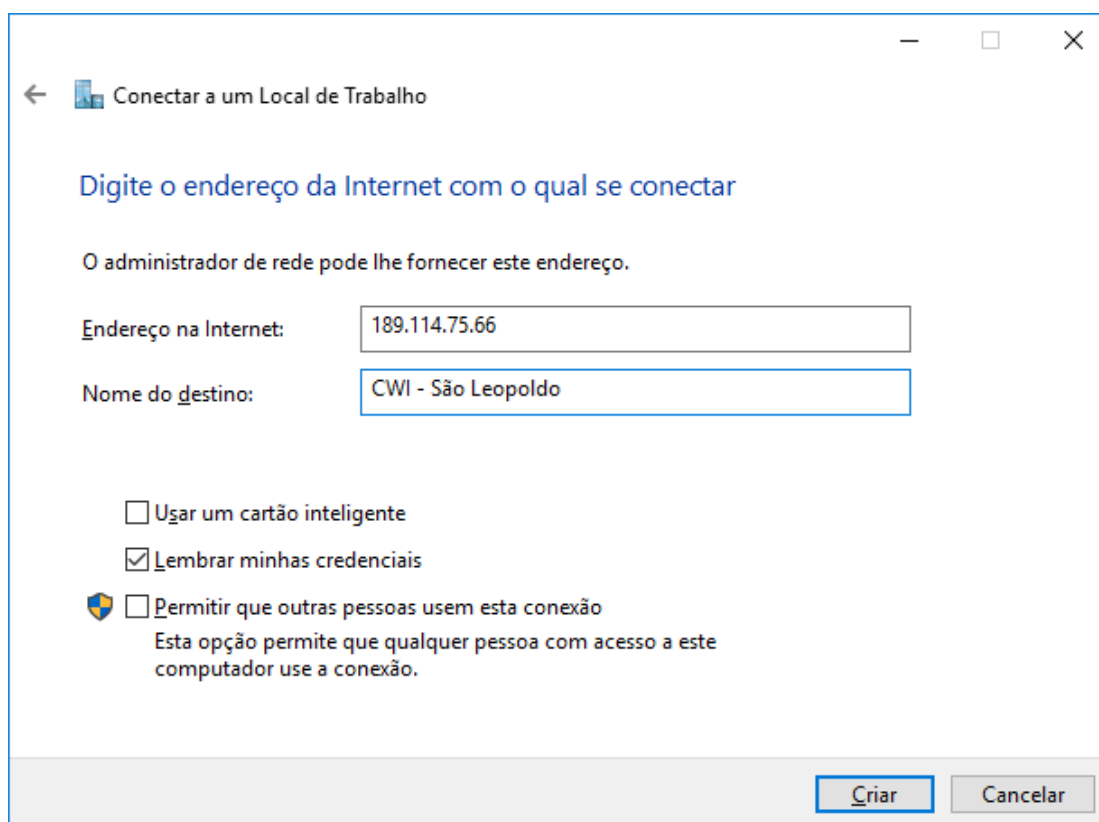

4. Selecione “Conectar a um local de trabalho” e clique em “Avançar”.

5. Clique na opção “Usar minha conexão com a Internet (VPN)”.

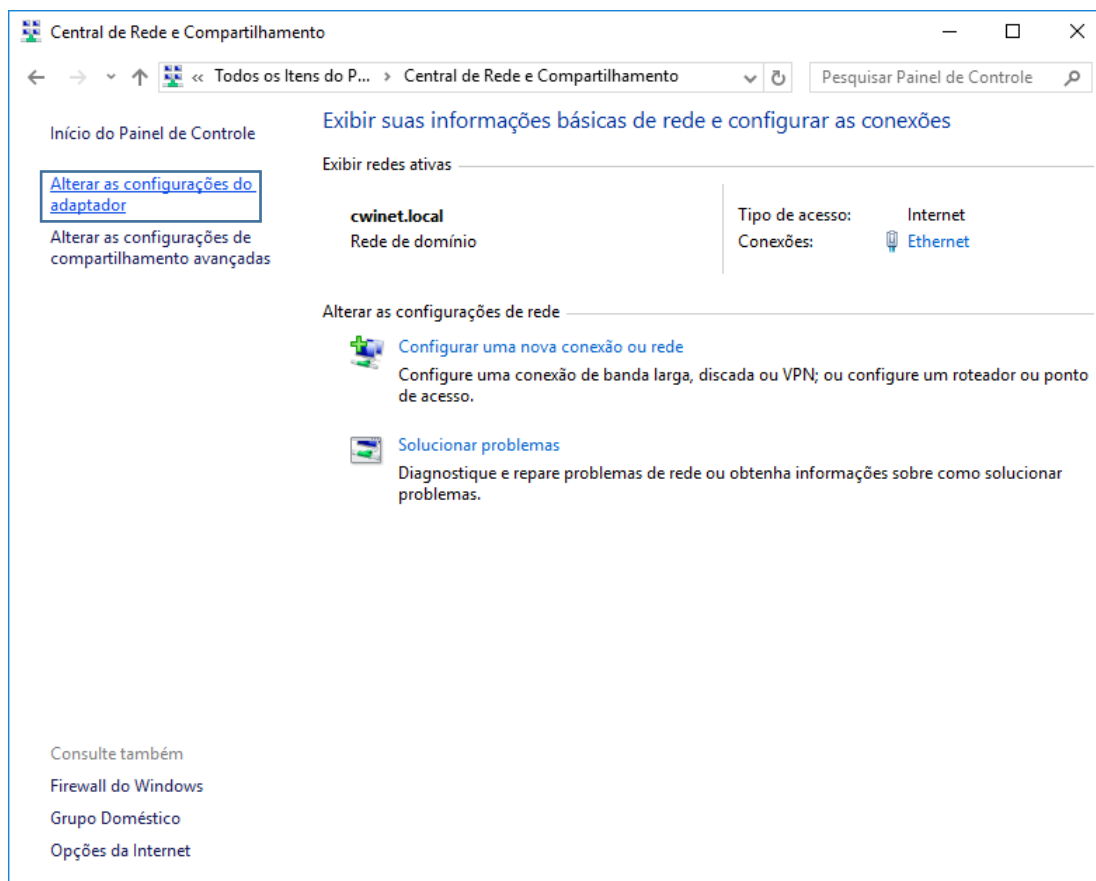

6. Preencha os campos conforme a imagem a seguir e clique em “Criar”.

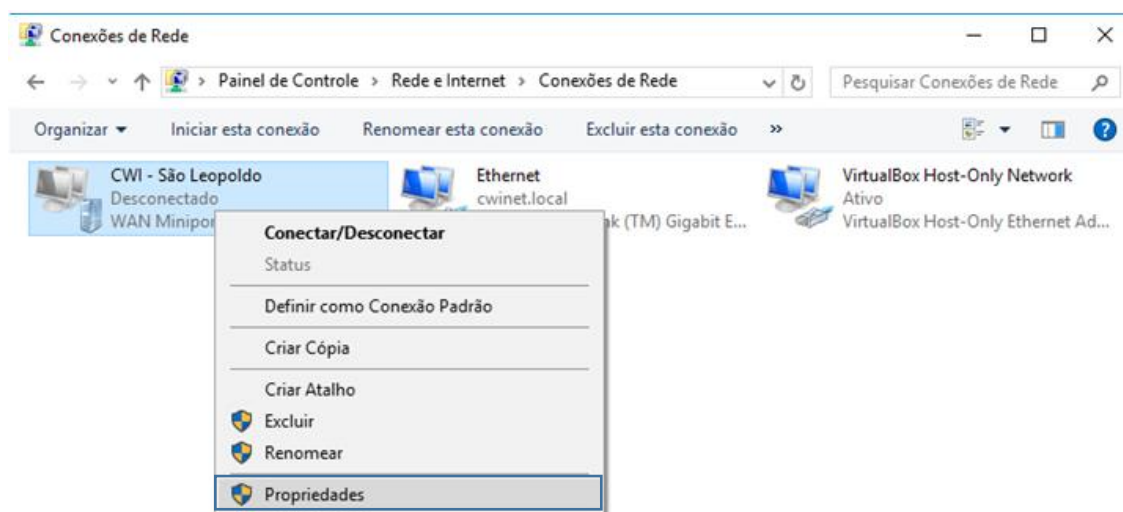

7. Ao finalizar a criação, não faça *login* ainda. Clique com o botão direito do mouse no ícone de conexão e selecione “Abrir a Central de Rede e Compartilhamento”.

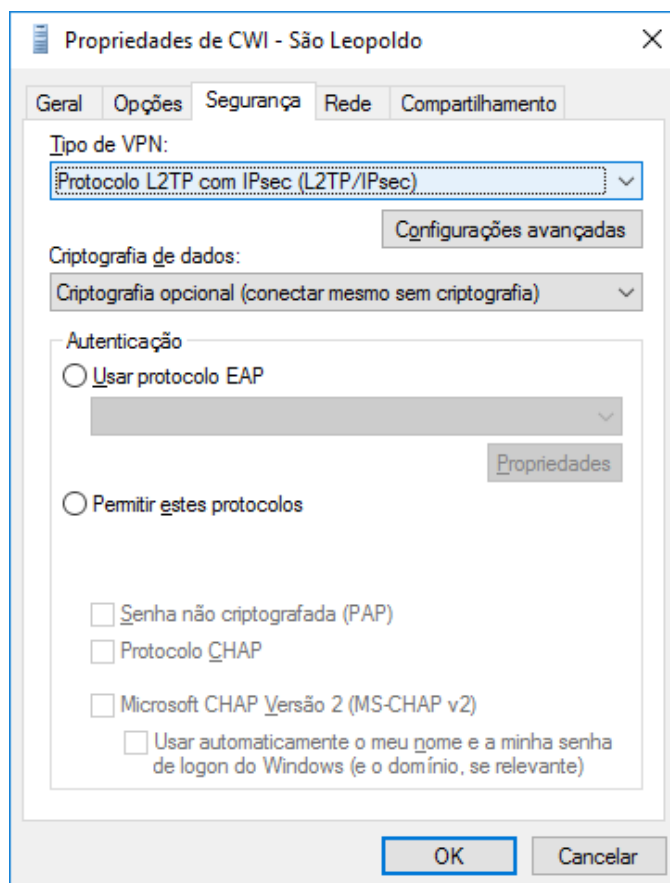

8. Clique em “Alterar as configurações do adaptador”.

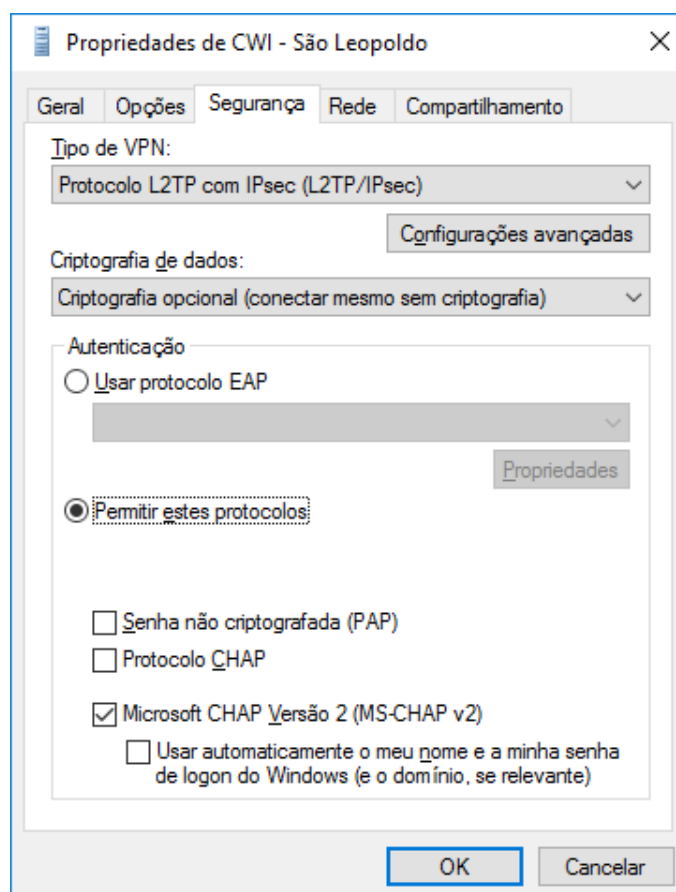

9. Clique com o botão direito na VPN recém-criada e selecione “Propriedades”.

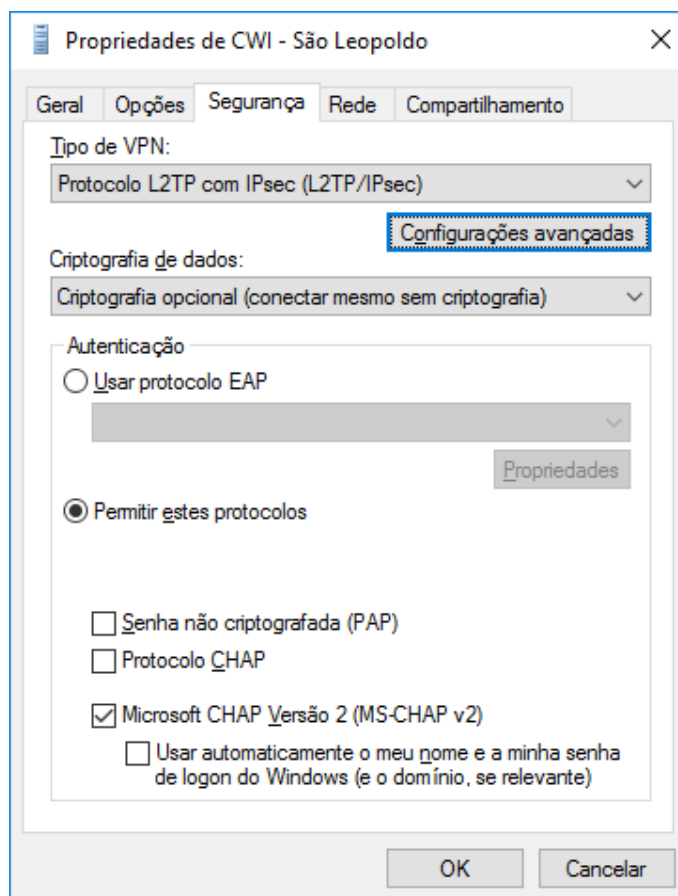

10. Na aba “Segurança” selecione “Tipo de VPN” conforme a imagem.

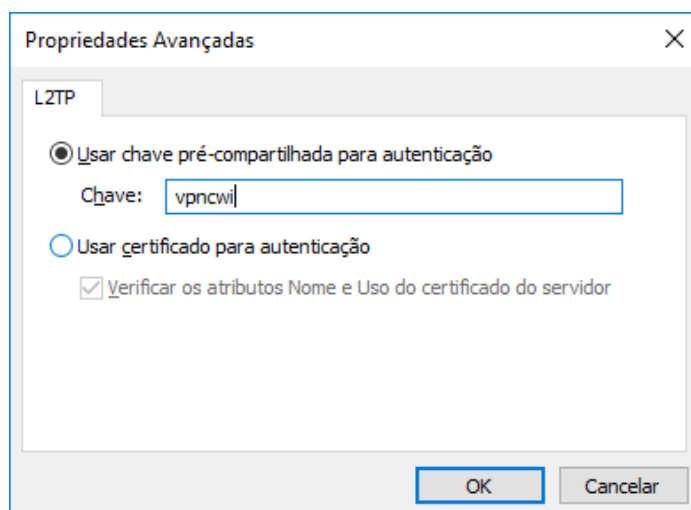

11. Marque as opções “Permitir estes protocolos” e “Microsoft CHAP Versão 2(MS-CHAP v2)” conforme a imagem abaixo.

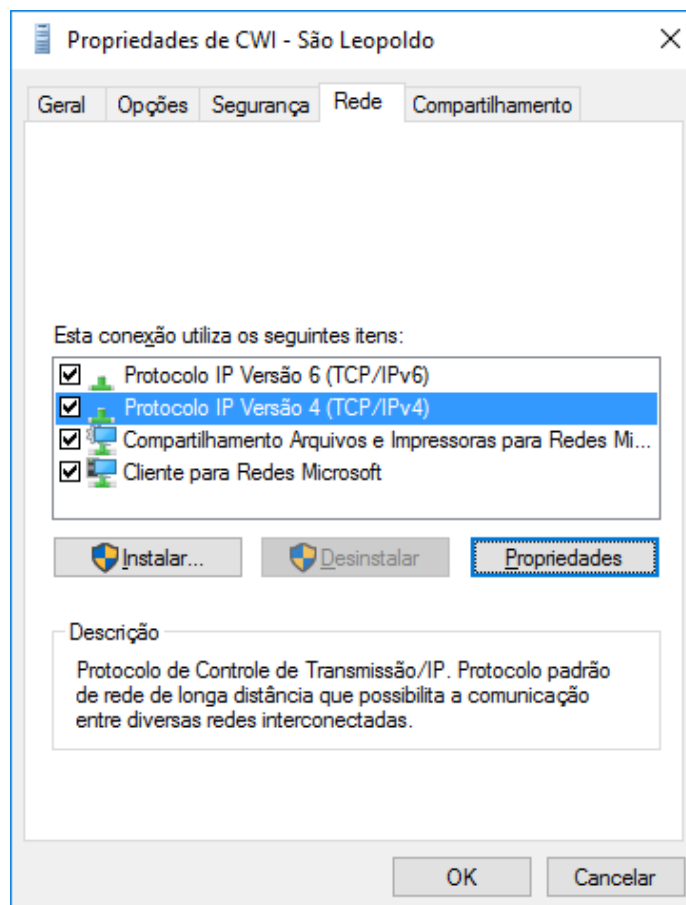

12. Clique em “Configurações Avançadas”.

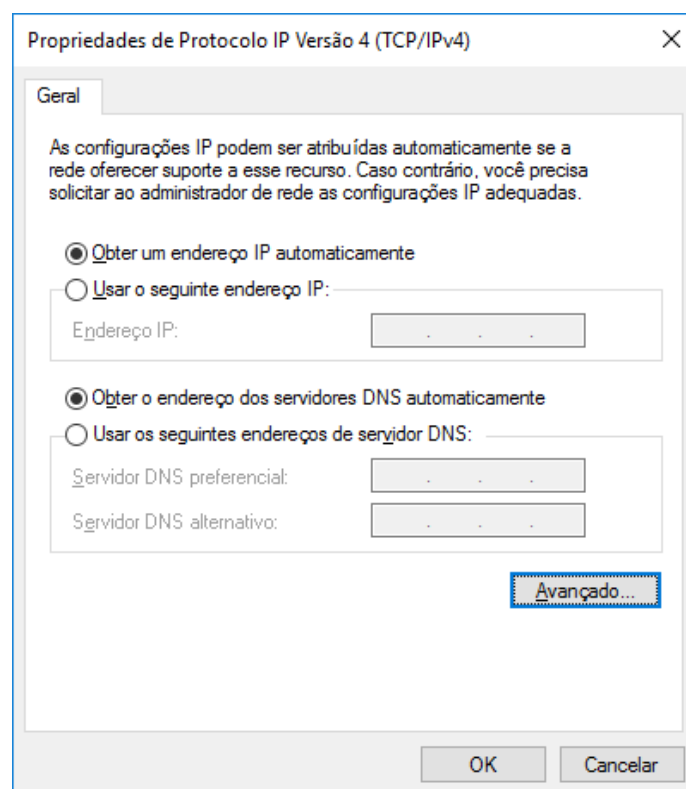

13. Marque a opção “Usar chave pré-compartilhada para autenticação”, digite a chave conforme a imagem e clique em “OK”.

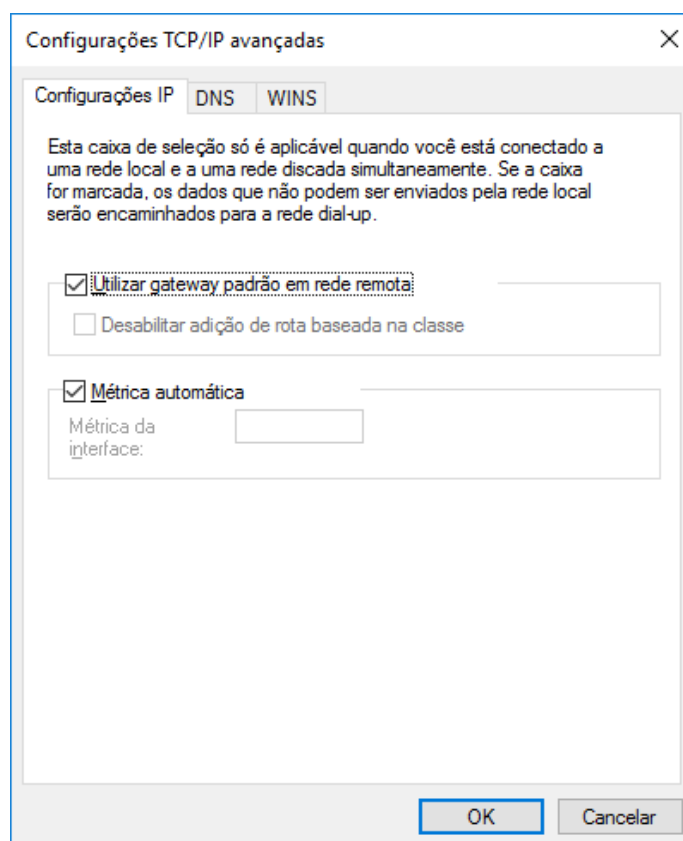

14. Na aba “Rede” Selecione a opção destacada e clique em “Propriedades”.

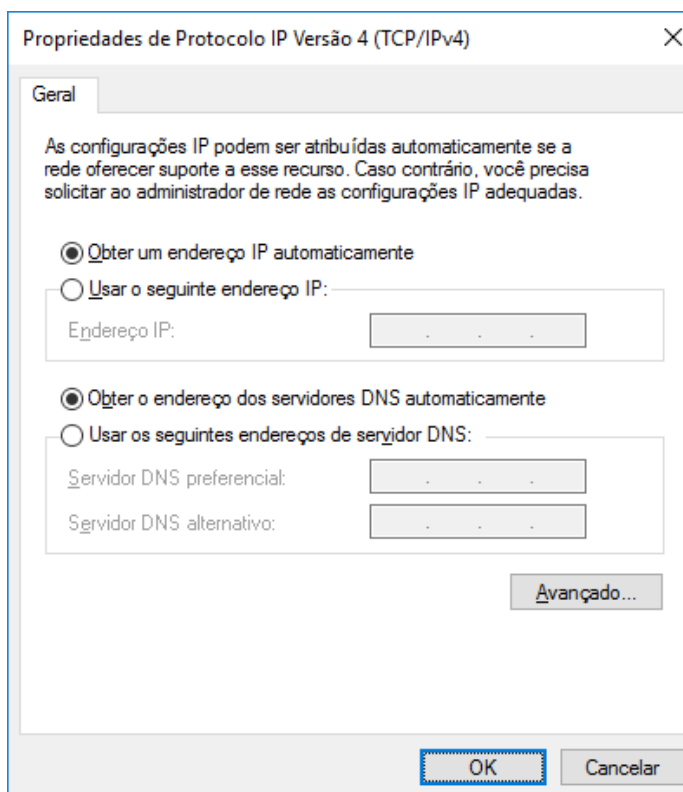

15. Clique em “Avançado”.

16. Desmarque a Opção “Utilizar gateway padrão em rede remota” e clique em “OK”.

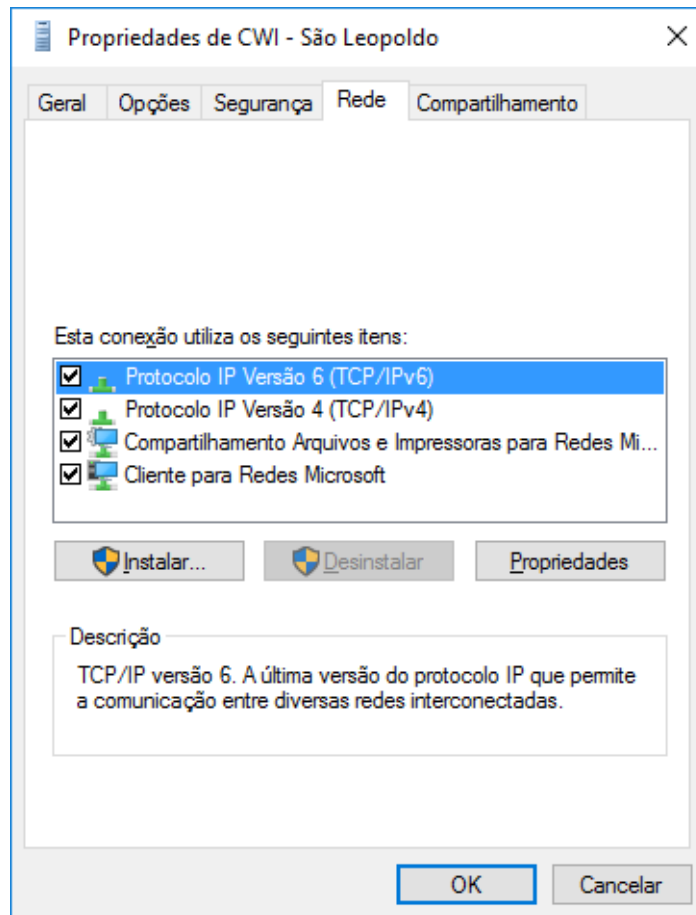

17. Clique em “OK” na janela que segue.

18. Agora selecione a opção destacada e clique em “Propriedades” e repita os passos 14,15 e 16.

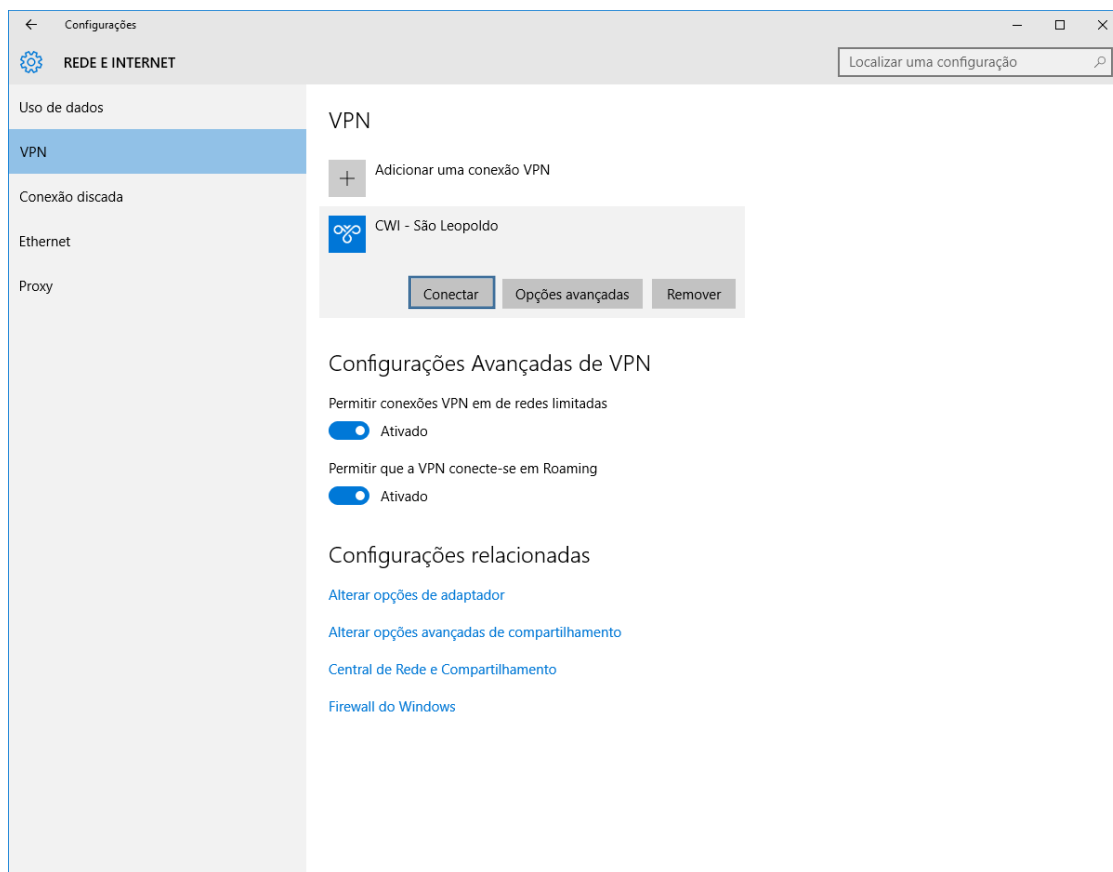

19. Clique no ícone de rede.

20. Clique na VPN criada.

21. Selecione a VPN criada e clique em “Conectar”.

22. Entre com as suas credenciais conforme o modelo abaixo.
